

Track online student progress using our progress reports

Two reports can be generated in our Learning Management System (LMS) that are able to track the progress of your students.

The **Activity Completion Report** displays your students, and whether they have completed the learning materials, quizzes and assessments within a unit.

The **Attempts Report** displays your students and their progress within the unit's learning materials and quizzes. This information includes if they have attempted them, when they first and last accessed them, how much time was spent attempting them, and if they have completed them.
