Knowledge Assessment

Student instructions

This assessment is designed to allow you to demonstrate your knowledge in the unit SHBXWHS001 – Apply safe hygiene, health and work practices.

In order to complete the assessment questions, you will need access to:

- Student Learning Materials
- Policies and Procedures
- Manufacturer instructions and Safety Data Sheets (SDS)
- Internet
- Any other source of relevant information

You are required to read and respond to each of the questions in the assessment. Your trainer will correct your assessment and provide feedback to you. Any incorrect or incomplete answers to these assessment questions must be resubmitted to your trainer.

Strategy	Description
Elimination	
Isolation	

EXCERPT SAMPLE ONLY. FOR A FULL SAMPLE CONTACT: admin@skindeeplearning.com

Administrative controls	
Engineering controls	
Personal protective equipment	

4. Sally works in a nail bar and is getting a sore back and shoulders from performing nail services all day. She is also getting a headache from the smell of the monomer.

Her manager decides to control the manual handling risk by doing the following two things:

- Purchasing some chairs that help to promote better posture.
- Creating a policy in the nail bar that employees must take breaks and perform stretching exercises every 90 minutes.

Her manager also decides to control the smell of the chemical by doing the following two things:

- Providing face masks for the staff to wear.
- Puts in an exhaust fan to ventilate the room.

(a) What are two (2) strategies from the hierarchy of control that Sally’s employer has used to help control the manual handling risk?

- Engineering controls
- Elimination
- Administrative controls
- Isolation
- Personal protective equipment

(b) What are two (2) strategies from the hierarchy of control that Sally’s employer has used to help control the smell of the chemical.

- Engineering controls
- Elimination
- Administrative controls
- Isolation
- Personal protective equipment
