# Performance Assessment 1

---

## Student Instructions

This assessment must be followed in sequence by doing the following:

1. You should answer all assessment questions in Part 1 of this assessment prior to carrying out the salon cleaning tasks. Your assessor should ensure Part 1 is corrected and deemed competent before you carry out Part 2 of the assessment.
2. You should carry out the specified salon cleaning routine in Part 2 of this assessment while being observed by your assessor at the following times:
  - Beginning of the day
  - During the day as needed
  - At the end of the day

## PART 1

In Part 1 of this assessment, you are required to carry out a salon cleaning routine. Part 1 of this assessment should be conducted by following the below steps in sequence:

### Prior to Assessment

You are to answer all questions in Part 1 of this assessment prior to carrying out the salon cleaning tasks. Your assessor will ensure Part 1 is correct and deemed competent before you carry out salon cleaning tasks.

### Prepare chemicals for use

1. You are to prepare cleaning chemicals for use prior to performing the salon cleaning routine in accordance with your answers in Part 1 of this document.

*When mixing cleaning chemicals remember to do the following:*

- *Put on appropriate Personal Protective Equipment as specified in the SDS for the chemical.*
  - *Dilute disinfectant solution with water using ratios specified in the manufacturer's instructions.*
2. After mixing the cleaning chemicals, you are to store the cleaning chemicals in accordance with your answers in Part 1 of this document.

*When storing cleaning chemicals remember to do the following:*

- *Store the diluted chemical in workplace container to be used for cleaning purposes and put a label on the container that identifies the chemical inside the container.*
- *Store remaining undiluted disinfectant according to manufacturer instructions and workplace policies and procedures.*

### Perform salon cleaning routine

3. You are to clean work surfaces and maintain common areas at the beginning of the day, during the day as needed, and the end of the day.

*When cleaning and organising work areas remember to do the following:*

- *Put on appropriate personal protective equipment to clean the work area.*
- *Tidy work area, benches and counters and put items that are out of place back into their designated places.*
- *Wipe down work surfaces and general salon areas with a clean, damp cloth and disinfectant solution prepared in the previous step.*

4. You are to store salon equipment at the beginning of the day, during the day as needed, and the end of the day.

*When storing salon equipment remember to do the following:*

- *Store all salon equipment that has been cleaned and disinfected or sterilised in the designated area to ensure cleanliness and readiness for the next use.*

5. You are to sort and dispose of waste at the beginning of the day, during the day as needed, and the end of the day.

*When sorting and disposing of waste remember to do the following:*

- *Sort waste into categories: recycling, hazardous waste, treatment waste, sharps, and clinical waste. All sharps and clinical waste must be disposed of in accordance with the Health and Hygiene and Skin Penetration Guidelines for your state or territory.*
- *Remove waste from treatment areas and reception areas promptly.*
- *Dispose of waste safely and to minimise negative environmental impacts.*

## PART 2

In Part 2 of this assessment, you are required to clean a simulated blood or body fluid spill. Part 2 of this assessment should be conducted by following the below steps in sequence:

### Prior to Assessment

You are to answer Question 6 in this document prior to cleaning the simulated blood or body fluid spill. Your assessor will ensure Part 2 is correct and deemed competent before you carry out the task.

### Clean blood or body fluid spill

6. You are to clean the simulated blood or body fluid spill in accordance with your answers in Question 6 in this document.
7. After you have cleaned the simulated blood or body fluid spill, you are to report the incident using the Incident Report Form provided in Part 2.

# Performance Assessment 1 – Clean general salon area and simulated blood spill

---

## Part 1 – Answer questions about the cleaning task

These questions must be answered BEFORE you start the salon cleaning task.

1. Read the Housekeeping Policy in the Policies and Procedures Manual to answer the following questions:  
(a) When should you clean work surfaces?

- (b) How should salon equipment be stored?

2. Read the Safe Work Policy in the Policies and Procedures Manual:

- (a) List three (3) safety precautions you will use when handling chemicals to complete the salon cleaning routine.

- (b) What personal protective equipment will you use to clean your work area?

EXCERPT SAMPLE ONLY. FOR A FULL SAMPLE CONTACT: [admin@skindeeplearning.com](mailto:admin@skindeeplearning.com)

***For this assessment, you will be required to perform a salon cleaning routine and clean a simulated blood spill. Answer the following questions about how you will perform the salon cleaning routine. You will then need to perform the routine in accordance with your answers.***

3. What disinfectant solution will you use in your workplace to perform the cleaning routine?

4. (a) Read the manufacturer instructions for the disinfectant solution you will use to complete the cleaning routine, and write down how you should dilute the solution.

*Specify what should be used to dilute the disinfectant and the ratios that the disinfectant should be diluted.*

(b) Read Safety Data Sheet (SDS) for the cleaning and disinfectant solution and write down the personal protective equipment you need to wear when handling the chemical.

(c) How should the chemical be stored, as specified by the SDS?

(d) Where in your workplace will you store the chemical after you have finished mixing and using it?

EXCERPT SAMPLE ONLY. FOR A FULL SAMPLE CONTACT: [admin@skindeeplearning.com](mailto:admin@skindeeplearning.com)

(e) After you have diluted the disinfectant solution, you will need to create a label for the diluted mixture that identifies the solution in the container. What will you write on the label?

5. Read the Health and Hygiene and Skin Penetration Guidelines for your state or territory. How should you dispose of the following waste when performing salon cleaning duties according to the Guidelines and your workplace procedures?

<b>Hazardous waste</b>	
<b>General and treatment waste</b>	
<b>Clinical waste</b>	
<b>Cardboard</b>	
<b>Contaminated sharps</b>
